Profile

Industrial Engineering & Management (B.Sc.) graduate from BGU and Digital Game Design (M.A.) student at Shenkar. Currently a Product & System Implementation Manager, specializing in building digital workflows and automating processes for large-scale systems. Former IDF Captain with experience in operational planning and resource management.

Experience

Product & System Implementation Manager

Mgroup | 2025-Present

- Gathering business requirements and configuring end-to-end digital processes on the Monday.com platform.
- Designing automated workflows, data structures, and user permissions for government-scale systems (Ministry of Education).
- Conducting workshops and training sessions for stakeholders to define system use cases and improve user engagement.

Process Analyst

Analyst - Investment House | 2023-2025

- Analyzed and mapped complex financial workflows, converting business strategies into structured multidimensional data models and optimized digital processes.
- Identified bottlenecks through data analysis; collaborated with Finance and Legal teams to implement automated improvements and ensure data consistency across the organization.

Information Systems Coordinator

AEAI - Association of Engineers and Architects in Israel | 2021-2024

- Database administration and website content management; optimized information systems for a large-scale professional association.

Project Coordination & Operations

Ministry of Health | 2019-2021

- Managed administrative operations and cross-departmental coordination during a large-scale national emergency (COVID-19).

Human Resource Officer (Captain)

IDF | 2015-2019

- Led organizational frameworks and resource prioritization in high-pressure environments, focusing on process optimization and leadership.

Education

M.A. in Game Design & Development, Shenkar, 2025-Present

B.Sc. in Industrial Engineering & Management (Information Systems), BGU, 2021-2025

Key Project - Product Lead & dev - Capstone Project: Unity Voice

Ben-Gurion University | 2024-2025

- Led the development of an AI-powered platform using React.js and MySQL, integrating OpenAI's API.
- Optimized LLM performance through refined prompt design;
- Final Grade: 97; Nominated for Faculty Excellence Award; secured support from Microsoft for Startups.

Skills

Data & Analysis: SQL (MySQL), Power BI, Tableau, Advanced Excel (VBA, Data Modeling, KPI Tracking).

SaaS & Product: Monday.com (Advanced Logic & Admin), Salesforce, Figma (UX Flows).

AI & Technical Literacy: Prompt Engineering, OpenAI API Integration, JavaScript, HTML/CSS, Unity (C#).
